EDUCATION

Ph.D. Aerospace Engineering, University of Maryland, College Park, expected 2024

M.Res. Aeronautical Engineering, University of Cambridge, 2019

B.S. Mechanical Engineering, New York University, Tandon School of Engineering, 2018

RESEARCH EXPERIENCE

2020– Separated and Transient Aerodynamics Laboratory (STAL)
University of Maryland, College Park
Graduate Research Assistant, Department of Aerospace Engineering

The thesis project encompasses an experimental investigation of force transients experienced during wing-gust encounters as well as the development of lift regulation strategies for gust mitigation. Emphasis is placed on successfully incorporating flow sensing information in flight controllers, in the presence of unsteadiness and measurement uncertainty.

2021– NATO Applied Vehicle Technology (AVT) Panel
AVT–347: Large-amplitude gust mitigation strategies for rigid wings
Technical Team Member

This panel consists of an international team of scientists committed to determining the most promising control methods for large-amplitude gust encounters and integrating flow models into control algorithms. Participation in this group involves presenting and sharing research results as well as discussing research ideas and questions.

2018–19 Whittle Laboratory
University of Cambridge
Graduate Research Assistant

This project aimed to create a methodology capable of predicting Low Frequency Rumble (LFR) in aviation gas turbines, by characterizing the reflectivity of the Nozzle Guide Vanes (NGV). A thermoacoustic solver was developed and used to predict the reflectivity of one-dimensional subsonic and chocked nozzles.

2016–18 Dynamical Systems Laboratory
New York University, Tandon School of Engineering
Undergraduate Researcher

This research studied causal relationships in swimmer models as part of a project to develop biomimetic underwater robots. Transfer entropy was validated as a tool to quantify information transfer between tandem airfoils in a uniform flow.

TRAINING

2022 Particle Image Velocimetry
Burgers Program for Fluid Dynamics
Delft University of Technology, Netherlands, October 10-14 2022

2019 Combustion Aerodynamics and Technical Computing
National Centre for Combustion and Aerothermal Technology
Loughborough University, United Kingdom, January 2019

2019 Combustion-Turbine Interaction and Integration
Oxford Thermofluids Institute
Oxford University, United Kingdom, March 2019

2019 Compressor Stall
Whittle Laboratory
Cambridge University, United Kingdom, February 2019

GRANTS AND AWARDS

Awards and Honors

2023 Clark Doctoral Fellows Mid-Career Award

2023 Outstanding Graduate Assistant Award

2017 Undergraduate Student Research Fellowship

2014–18 Tandon Scholarship of Academic Merit

COURSES TAUGHT

University of Maryland, College Park

Dynamics of Aerospace Systems (Teaching Assistant)

Aerodynamics (Teaching Assistant)

MEMBERSHIPS

The American Institute of Aeronautics and Astronautics

American Physical Society Division of Fluid Dynamics
